🧠 Skills

Language & Frameworks

- JavaScript
- React
- Java
- Node.js
- MongoDB
- SQL

Containerization

- Docker
- Kubernetes
- JFrog Artifactory

CI/CD

- SnakeCi
- Github Actions

🎓 Education

Western Michigan University

Bachelors of Science -
Computer Science 2019

🎸 Interests

- Godot Game Engine
- Theatre
- Interacting with new APIs

📄 Profile

Outgoing and experienced Software Engineer seeking a position on your team. With hard work effort, great companionship, and a strong focus on loyalty, your company would be a perfect fit.

📁 Professional Experience

Level Data Inc.

Software Engineer II

Apr 2021 – present

- Pioneered a data validation platform for K-12 school districts to assist with keeping their data clean for state reporting.
- Containerized webpack bundle, NodeJS API, and batch processing jobs using Docker, and JFrog artifactory.
- Researched, configured, and deployed Keycloak authentication to Kubernetes.
- Incorporated multi-tenant authentication and authorization using Keycloak and Express routes on within NodeJS.
- Built Role Base Access Control within the platform, allowing district admins to delegate permissions as needed.
- Configured and setup automated deployments (CI/CD) using SnakeCI and automatic publishing of new versions.

Integrations Engineer

Dec 2018 – Apr 2021

- Maintained a Java library that supported over 1000 scheduled.
- Assisted data integration for school districts around the world with 'connectors' (E.T.L)
- Worked closely with school representatives and maintained project deadlines.
- Designed and implemented an error monitoring web portal using SpringBoot to save workers 100+ hours.
- Created new integrations to obtain data from a variety of different source locations including using Rest APIs, executable files, and web scraping.

Software Developer

Journey Gaming

Feb 2016 – Dec 2018

- Supported a gaming network with 100+ active users.
- Implemented features into a Java codebase brought to attention from users and staff.
- Constructed a virtual trading market for users to buy and sell items.
